

TRUE METALLIC METAL

The new way to bring metal to life

What is the TMM technique?

The **True Metallic Metal (TMM)** technique seeks to represent realistic metallic surfaces using metallic paints, rather than simulating metal with flat colors as in **Non-Metallic Metal (NMM)**.

TMM allows painters to achieve natural reflections and a visually striking finish with less pictorial artifice, preserving the material richness of metal in miniature.

To master this technique, simply using a metallic paint is not enough. **TMM** requires applying the classical principles of light and shadow used in volume modeling - working with gradients, transitions, and contrasts, just as in any other non-metallic finish.

For years, painters have searched for a way to achieve realistic metallic finishes, with shine, depth, and control over light reflection.

True Metallic Metal (TMM) is Vallejo's answer to that search.

Always follow the information on the product label. Contains 1,2-benzisothiazol-3(2H)-one, reaction mass of 5-chloro-2-methyl-2H-isothiazol-3-one and 2-methyl-2H-isothiazol-3-one (3:1). May produce an allergic reaction.

The TRUE METALLIC METAL Range

Vallejo presents **True Metallic Metal**, a range developed to offer control, consistency, and spectacular results through simple, effective techniques for painting metallic surfaces on miniatures.

The range is designed to cover the entire color spectrum with metallic paints, organized into **20 chromatic families**.

Each family includes **four sub-ranges** that work in perfect harmony:

BASE Main metallic tone.

LIGHT Metallic highlight.

SHADE Non-metallic satin wash.

AIRBRUSH Metallic base formulated for airbrush use.

Each chromatic family functions as a self-contained color unit but is also formulated to allow inter-family combinations and mixing. This makes it possible to create color gradients, cross reflections, or temperature variations while maintaining visual coherence.

BSL applied to metal

Unlike other systems that rely on constant improvisation, **True Metallic Metal** provides a structured guide to painting with logic. Each color in the system has its own BSL family, allowing painters to plan ahead, maintain chromatic coherence throughout the miniature, and reproduce results consistently, whether painting large units or showcase pieces.

The **BSL system applied to metal** allows painters to plan each element from its value structure: where the light hits, where the shadow falls, and what metallic tone reflects it.

A complete, coherent, and practical system, designed for any kind of miniature: fantasy, Sci-Fi, historical or wargame.

Sub-range features

BASE

Formulated with ultra-fine metallic effect particles, these paints deliver a spectacular result and a shine appropriate to scale. **High covering power** for base layers, with a **smooth**, even finish and **excellent self-leveling** properties that prevent brush marks. All colors can be mixed to create new tones.

LIGHT

Designed to highlight the BASE colors. Brighter and more reflective versions of the 20 BASE tones, they can be mixed in different proportions to achieve **intermediate highlights**. Their fine finish allows **smooth blending** between tones for seamless color transitions.

SHADE

Designed to shade the BASE colors. With a **satin finish** that preserves the shine of the previous Base layer, these washes are darker, non-metallic versions of the 20 BASE tones. They allow **subtle shading** in mid-tones and strong lining in recesses. They can be thinned with water to create smooth gradient effects in shadows. Colors can be mixed together.

AIRBRUSH

Specific formulation for airbrush use of the 20 BASE colors. They are chromatically identical to their BASE counterparts, with an **even finish** and **strong color intensity**. They do not require thinning, although they can be diluted with Airbrush Thinner for subtle effects. Over-thinning may cause uneven results.

*Recommended nozzle: 0.3 mm; pressure: 1.8 bar / 26.1 psi.
Allow adequate drying times between coats for best performance and finish stability.*

DISPLAY

EX743/743FULL

True Metallic Metal / True Metallic Metal sets

80 colors in 18 ml / 0.6 fl oz bottles (20 chromatic families × 4 references)

64 sets of 4 colors (8 references)

The **True Metallic Metal** display includes the complete range of 20 chromatic families developed according to Vallejo's BSL (Base, Shade, Light) system.

Each family includes four references: **LIGHT**: metallic highlight, **BASE**: main metallic color, **SHADE**: satin shading tone, and **AIRBRUSH**: metallic base formulated specifically for airbrush use - offering a practical and coherent solution for painting metallic effects on fantasy, historical, and wargame miniatures.

The lower hangers also include 8 chromatic family sets, each with 4 colors.

Width: 26.57 in/67,5 cm

Depth: 9.05 in/23 cm

Height: 41.93 in/106,5 cm

TRUE METALLIC METAL CASE

Full Collection

Ref. 77.250

80 x 18 ml/0.6 fl oz True Metallic Metal

This case contains all 80 colors from the True Metallic Metal range, organized into 20 chromatic families, each with its corresponding Base, Shade, Light and Airbrush version - the complete BSL system applied to metal.

It includes 20 Light colors, 20 metallic Base tones, 20 non-metallic satin Shades, and 20 Airbrush Base colors. The case also comes with one round brush, one Dry Brush and two exclusive miniatures, specially designed for this collection.

SETS

The **4-color sets** offer a compact and organized way to work with each chromatic family.

Each set includes the four tones that compose it - **BASE**, **LIGHT**, **SHADE** and **AIRBRUSH** - providing a complete and logical solution for painting metals in a specific hue.

Each set is designed within the **BSL system** structure, ensuring consistent, reproducible results adaptable to any painting style.

Sterling Silver Paint Set

Ref. 77.251

4 x 18 ml/0.6 fl oz True Metallic Metal

A neutral and pure silver tone suitable for any purpose. Ideal for armor, weapons, machinery or as a base for mixing with other colors.

The set includes:

77.101	77.121	77.141	77.161
Sterling Silver (Light)	Sterling Silver (Base)	Sterling Silver (Shade)	Sterling Silver (Airbrush)

Imperial Gold Paint Set

Ref. 77.252

4 x 18 ml/0.6 fl oz True Metallic Metal

A warm, deep gold with orange undertones. Perfect for ornaments, fantasy armor, noble characters or historical miniatures.

The set includes:

77.103	77.123	77.143	77.163
Imperial Gold (Light)	Imperial Gold (Base)	Imperial Gold (Shade)	Imperial Gold (Airbrush)

Ancient Copper Paint Set

Ref. 77.253

4 x 18 ml/0.6 fl oz True Metallic Metal

A reddish metallic tone with an aged character, ideal for worn metals, relics or as a complementary hue for golds.

The set includes:

77.104	77.124	77.144	77.164
Ancient Copper (Light)	Ancient Copper (Base)	Ancient Copper (Shade)	Ancient Copper (Airbrush)

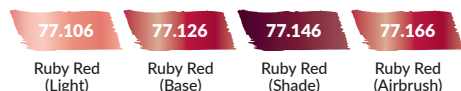

Ruby Red Paint Set

Ref. 77.254

4 x 18 ml/0.6 fl oz True Metallic Metal

A cool, intense metallic red. Perfect for armor, magical weapons, futuristic designs or eye-catching details. Excellent for exploring reflections, contrast, and lighting effects.

The set includes:

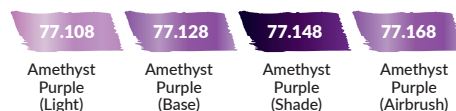

Amethyst Purple Paint Set

Ref. 77.255

4 x 18 ml/0.6 fl oz True Metallic Metal

A reddish-purple with a magical, mysterious touch. Use it on arcane elements, enchanted armor or sci-fi and dark fantasy details.

The set includes:

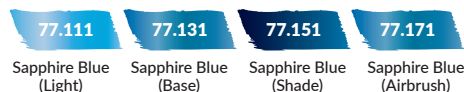

Sapphire Blue Paint Set

Ref. 77.256

4 x 18 ml/0.6 fl oz True Metallic Metal

A bright, saturated metallic blue that adds depth and contrast. Ideal for armor or tempered steel effects, bringing a dynamic and vibrant touch to any palette.

The set includes:

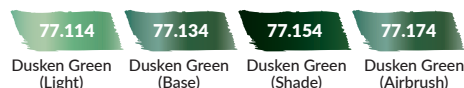

Dusken Green Paint Set

Ref. 77.257

4 x 18 ml/0.6 fl oz True Metallic Metal

A dark green with cool undertones, ideal for ancient metals, artifacts or mysterious finishes. Works especially well in muted, realistic schemes or combined with earthy tones.

The set includes:

Aged Metal Paint Set

Ref. 77.258

4 x 18 ml / 0.6 fl oz True Metallic Metal

A muted brownish metallic tone designed to evoke weathered, time-worn surfaces. Perfect for war machines, sci-fi panels, medieval armor or scenery elements.

The set includes:

TRUE METALLIC METAL

From the shine of metal
to the depth of color

A new standard in miniature painting
