WET PALETTE

The **wet palette** is a tool used mostly by miniature painters and modelers to keep acrylic paints moist and workable for longer periods of time.

It consists of an airtight **container** containing a moistened sponge covered with a special sheet of paper that allows moisture to pass through.

The container is composed of a lid and a base with a rubber seal that ensures watertightness and keeps the internal humidity for a long time.

The sponge and the water needed to keep it moist are placed in the base.

The **hydration sponge** is one of the key components of a wet pallet. Its primary function is to hold water and provide a constant source of moisture to the palette paper, preventing acrylic paints from drying out quickly.

The **moisture-retaining** paper allows moisture from the sponge to reach the surface and is strong enough to prevent it from breaking down or decomposing when in contact with the paint.

WET PALETTE

Pro Painter Size

Ref. B90001

x1 wet palette
x2 hydration sponge
x30 moisture paper
x1 well palette
x1 elastic band

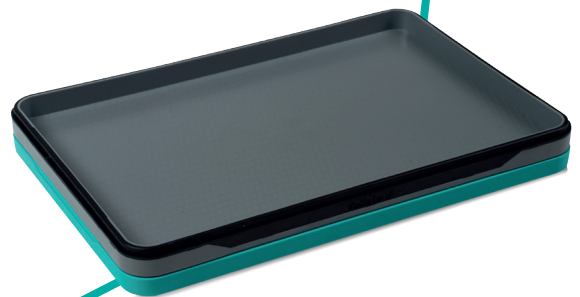

CONTENTS:

• Wet Palette | x1

240x160 mm | 9.45x6.3 in

Made of high-strength ABS plastic. Rubber seal between case and lid provides excellent air tightness when closed. Case has non-slip rubber pads to ensure stability. The lid fits under the case to save space. The lid can also be used as a second palette. It has magnets on both sides to attach the Well Palette.

• Hydration Sponge | x2

220x140 mm | 8.66x5.52 in

Made of PVA, it has the necessary thickness to ensure moisture retention for long periods of time, maintaining an adequate water reserve without oversaturating the paper. It is designed to be reusable and easy to clean.

• Moisture Paper (60gr/m2) | x30

225x145 mm | 8.86x5.71 in

Moisture-resistant membrane paper. It is designed to be thin enough for moisture transfer, but strong enough to withstand paint application and handling for color mixing.

Finished in white so as not to alter the perception of colors.

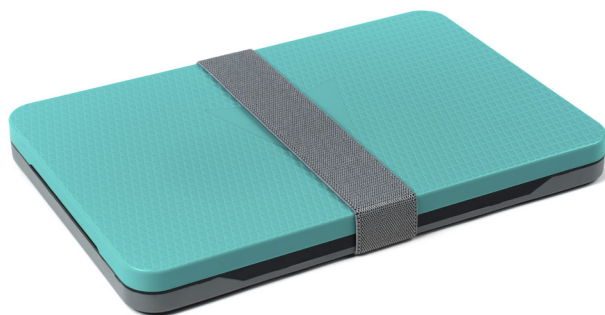

*Be sure to place the matte side in contact with the sponge and use the satin side for painting.

- **Elastic band | x1**

150x35 mm | 5.9x1.38 in

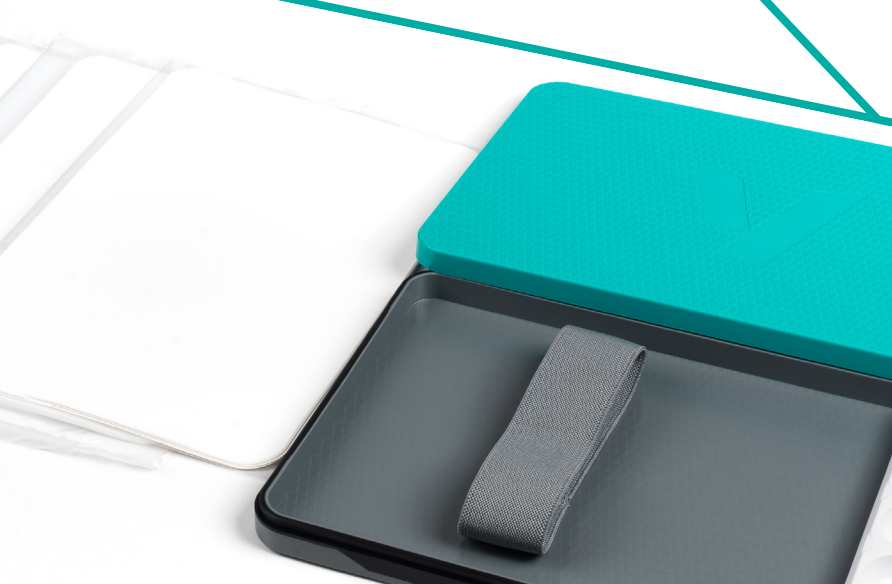

Ensures a tight seal for your palette during transport.

- **Well Palette | x1**

150x35 mm | 5.9x1.38 in

Made of ABS plastic, it has 5 wells for mixing or thinning colors, saving space on the paper. Fits on the sides of the base of the wet palette by means of magnets.

RELATED PRODUCTS

You have run out of our paper and need more to continue painting? Your sponges are stained from use and you need new ones? Do you want to attach another accessory palette to your wet palette? Don't worry, we offer spare parts for all your Wet Palette accessories:

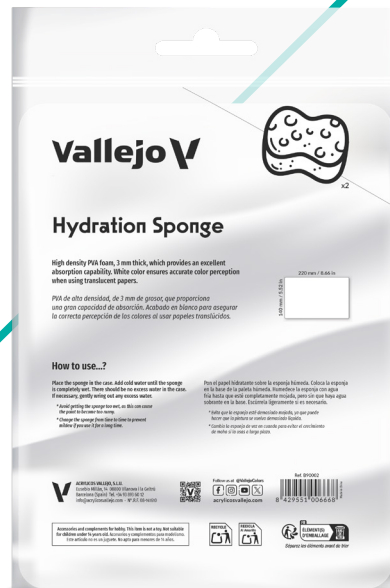

Hydration Sponge | x2

Ref. B90002

220x140 mm | 8.66x5.52 in

Hydration Sponge refill for Wet Palette Pro Painter Size.

High density PVA foam, 3 mm thick, which provides an excellent absorption capability. White color ensures accurate color perception when using translucent papers.

Well Palette | x1

Ref. B90004

150x35 mm | 5.9x1.38 in

Made of high-strength ABS plastic. Attaches to wet palette with magnets. Allows you to dilute the paints and create new mixtures. Includes notches to hold your brushes.

Moisture Paper | x30

Ref. B90003

225x145 mm | 8.86x5.71 in

Moisture Paper refill for Wet Palette Pro Painter Size.

Paper specially treated that allows moisture to pass through. Finished in white to preserve the perception of colors. High resistance to rubbing.

*Be sure to place the matt side in contact with the sponge and use the satin side for painting.
